EXPERIENCE

Lead Senior Software Engineer

Feb. 2025 - Present

[Supio](#)

Remote

- Lead a team of 5 engineers through agile sprints, technical planning, and cross-functional collaboration with product, sales, and marketing to deliver AI-driven legal tools.
- Architected an LLM workflow orchestration system in TypeScript integrated with Claude and OpenAI models for rapid deployment of legal document blueprints using context management and prompt engineering best practices.
- Built and deployed legal drafting agents in Python (smolagents, LangChain) for automated document generation and review.
- Designed a cursor-style drafting interface integrating AI RAG chat for real-time verification and natural-language editing.
- Delivered a full drafting suite—including expert disclosure, demand letter, and medical summary generators—adopted by 20+ law firms within the first quarter, improving drafting speed and consistency across client workflows.
- Led the integration of coding agents like Codex and Claude Code, establishing best practices for secure, efficient, and maintainable AI-assisted development workflows.

Senior Software Engineer

Jan. 2024 - Nov. 2024

[Hewlett Packard Enterprise](#)

Remote

- Worked full stack on a greenfield RAG evaluation and deployment service which primarily used Go, Python, TypeScript, React, Kubernetes, Postgres, Milvus, and RabbitMQ.
- Lead the RAG evaluation React frontend project. Evaluation streamed DeepEval results with WebSockets to evaluate RAG applications using metrics like groundedness, context relevancy, and answer relevancy when compared against expected output.
- Helped define the frontend architecture into core components reused across the app with tools like Vite, ESLint, Prettier, Storybook, Jest, Playwright, Orval, Zod, and MSW.
- Implemented performance critical features in a JupyterLab extension for managing large data-driven pipelines training LLMs.
- Worked closely with product managers and designers to deliver stories sometimes requiring presentations to stakeholders and technical design documents.

Principal Software Engineer

Feb. 2021 - Apr. 2023

[Devoted Health](#)

Remote

- Remote role working with Go on the backend and TypeScript React on the frontend.
- Drafted stories for a React customer service app by participating product design meetings and developed them until release.
- Scaled ETL pipelines that had to meet the demands of fast user growth.
- Lead project redesigning the RISK engine which is the primary revenue stream enabling claim reimbursement by the US government.

Freelance Software Engineer

Aug. 2020 - Jan. 2021

[Self-Employed](#)

Remote

- Contract work building APIs and React web applications for small to mid-sized companies.
- Computer Science tutoring and classes for teaching university students web development.

Lead Senior Software Engineer

Jul. 2018 - Jul. 2020

[Humble Bundle](#)

Remote

- Promoted from Senior Software Engineer to Lead Senior Software Engineer II of the Platform team.
- Developed features for a Python and React e-commerce website that averages 26 million views per month.
- Executed a project to migrate all sessions to the newly required TOTP two-factor system with OAuth Google login.
- Led the internationalization project for an 8-year-old application and educated other developers on how to use these tools.
- Managed 5 direct reports including regular one-on-one meetings, code reviews, and pair programming.

Lead Full Stack Software Engineer

Jan. 2018 - Aug. 2018

[Committee for Children](#)

Seattle, WA

- Led the replacement of a legacy, monolithic DNN platform to a high performance platform utilizing using React and .NET Core.
- Migrated user authentication to the IdentityServer4 OpenID identity provider.
- Incrementally transformed a series of untested stored procedures into a modern C# WebAPI.
- Developed a TypeScript React frontend powered by an ASP.NET Core C# backend to track the delivery of coursework to students.

Full Stack Software Engineer

Jul. 2013 - Dec. 2017

[Trov](#)

Remote

- Remote software development team where developers wrote unit and integration tests.
- Constructed an on-demand insurance platform for consumer items with ASP.NET C# and SQL.
- Developed an app for managing claims and insuring items with a Typescript React frontend and ASP.NET C# backend.
- Built a business intelligence system for sending information to Trov's partners using Python.

Application Researcher

Jan. 2013 - Nov. 2013

[University of Washington](#)

Seattle, WA

- Lead developer for the TypeScript library that abstracted cloud storage services like Dropbox, Google Drive, and AWS.
- Contributed to a research paper on abstracting cloud storage.

Software Engineer Intern
E*Trade

Sept. 2012 - May 2013

Seattle, WA

- Worked on an international team to develop high performance stock trading apps implemented in Java
- Developed high-frequency trading features that supported options (contracts to buy a stock at a given price in a span of time).

Web Instructor and Engineer
University of Washington

Jan. 2012 - Jun. 2013

Seattle, WA

- Taught modern web development standards to University of Washington staff and students.
- Developed applications to manage courses and support tickets using Python and Django.

Software Engineer Intern
Rakuten

Apr. 2012 - Nov. 2012

Seattle, WA

- Scraped and normalized product information using Python.
- Worked with Overstock, Amazon, and Walmart APIs to gather product information and update listings.

Software Engineer Intern
SmiteWorks

Apr. 2011 - Nov. 2011

Bellevue, WA

- Worked on the FantasyGrounds chat feature using C.
- Led the development of a C app to import character data from competitors apps.
- Worked with the Steam gaming app store to publish updates and respond to customer feedback.

EDUCATION

Bachelor of Science in Informatics
University of Washington Seattle

GPA: 3.87

2011 - 2014

- Informatics as my major taught an interdisciplinary approach to technology covering topics a range of topics including computer science, business, design, user experience, and project management. It encouraged a broad foundation, but deep specialization within a given field. Within this major, I specialized in computer science.

PROJECTS

Minerva

- Personal productivity application featuring task management, note storage, and AI integration.
- Real-time data synchronization with Convex backend and sortable task management with rich markdown descriptions.
- Features oceanic design with glass morphism effects and fluid animations.

TypeScript React Next.JS TailwindCSS Convex Bun Vercel

TypeScript Database

- A transactional in-memory database for TypeScript with a string key/value REPL.

TypeScript Node.JS eslint prettier mocha sinon

Grimoire

- Next.JS powered notes and calendar app with a Material UI composed of small reusable components.
- GraphQL backend with access control for separate users that uses Prisma to persist data with Postgres.

TypeScript Next.JS Docker React GraphQL (Apollo) Postgres (Prisma) Material UI Css (Emotion)

Discord Management Bot

- Discord bots written in TypeScript running on Node.JS for logging, music, GPT-2 chatting, role management, and security monitoring.
- Scales to a discord of any size and can be configured with JSON to support any number of discords.
- Code is broken up into highly reusable modules that can be pulled into any TypeScript project for customization.

TypeScript Node.JS Docker Discord.js eslint prettier

dstruct

- Common data structures and algorithms for TypeScript.
- Based on Java collections, C# collections, and Google Java collections.

TypeScript Grunt Docker Bower Karma

TECHNICAL SKILLS

Programming Languages

Python TypeScript C# Go SQL Bash

Web Development

HTML CSS React Next.js TailwindCSS TanStack shadcn PostCSS

ASP.NET MVC Flask FastAPI Bun Node.js

Data & AI

OpenAI API Claude API smolagents LangChain LangSmith RAG

pandas NumPy jupyter PyTorch Elasticsearch

Databases

PostgreSQL MySQL MSSQL Convex

Soft Skills

Effective and concise communication Constructive feedback

Continuous learning and growth Problem solving with minimal guidance

Cloud & DevOps

AWS Google Cloud Microsoft Azure Cloudflare DigitalOcean Vercel

Docker Kubernetes cmake

Developer Experience & Tooling
